Your Future

Geology, earth science and the related fields in space science include studies of the physical, chemical and biological processes of the whole Earth, and the space and planetary environment in which the Earth is an integral part. Our department provides you with an in-depth education in the areas of geology, Earth science and space science.

The mission of the department is to integrate a range of scientific information regarding the Earth and its surroundings in space into a coherent and understandable framework. Programs in the department emphasize the importance of a student's appreciation of their physical surroundings and environment in their daily lives.
